

# AZEK Trim Outperforms Coil Wrap

Covering wood trim with aluminum coil wrap may seem like the inexpensive way to go, but not if it takes twice the time, looks awful and is difficult to install!

SAS Builders of Blacksburg, VA, prefers AZEK Trim as a durable, long-lasting replacement for aluminum coil wrap. AZEK Trim, from AZEK Building Products, is recognized as the #1 brand of trim. "AZEK Trim has superior moisture resistance in humid climates and there's no worry of wavy boards due to temperature changes," says Scott Stosser, SAS Vice President. Steve Sowers, SAS's exterior trim contractor, says "AZEK cellular pvc trim pays for itself and is ten times better than aluminum wrapped wood."

AZEK Trim vs. aluminum coil wrap:

- Cuts installation time in half
- Aesthetically looks great and won't ding and dent
- Low-maintenance and impervious to moisture and insect damage
- Long-term proven performance and durability
- 25-year warranty which wood and coil wrap do not have
- Perfect for garage door trim; ground contact is no problem
- AZEK Mouldings in 16 profiles has architectural detail and beauty
- Unlimited workability with clean, crisp mitering and routing
- Easily heat formed for curved window tops
- AZEK Trim performs great on longer runs
- AZEK Trim is the only trim product with an ICC code listing (ESR-1074)

"AZEK Trim installs easily in half the time, and has beautiful architectural detail," says Steve Sowers.

Aluminum coil wrap can dent and become wavy due to temperature changes.
